ENHANCES YOUR WORKFLOW
EASY TO USE POWERFUL
TIME-SAVERS SUSTAINABLE
STREAMLINED MORE THROUGHPUT
MORE CONTROL

Since the introduction of the first commercial ultracentrifuge in 1947 — the classic Beckman Model L — Beckman Coulter has been at the forefront of centrifuge innovation. Although the physics of this basic separation technique never change, Beckman Coulter continually designs new and innovative rotors and accessories, and develops advanced methods that allow the forces of centrifugation to be applied in new ways.

This centrifuge product selection guide is designed to help you determine the most efficient centrifuge tools for your laboratory.

Each section begins with a brief description of instruments that Beckman Coulter offers within that centrifuge category. Because biocontainment is a major concern in today's laboratories, Beckman Coulter provides a number of options that address this issue. Special BioSafe instruments and accessories are available across our centrifuge product line and are identified with these icons:

BioSafe and BioSafety are terms intended to describe the enhanced biocontainment features of our products.

BioCertified is a term used to describe our products which have been tested and validated to demonstrate containment of microbiological aerosols by an independent, third-party facility (Health Protection Agency, Porton Down, UK or USAMRIID, Ft. Detrick, MD, USA). Improper use or maintenance may affect seal integrity and, thus, containment.

BioEnhanced is a term intended to describe our products' enhanced level of biocontainment by design.

Rotors with the BioCertified symbol and have been tested to demonstrate containment of aerosols under normal operating conditions of the associated Beckman Coulter centrifuge when used and maintained as instructed.

Following the centrifuge descriptions, listings of their rotors are included with information on speed and g-force capability. Also included is information on tubes and bottles that can be used and the adapters they require.

Tubes and bottles are cross-referenced in a separate section that provides details on tube materials, chemical compatibility, tube designs, and tube closure options.

A reference section at the back of the guide includes quick-reference charts on instrument and tube selection, as well as frequently used formulas.

Avanti JXN Series

A new level of freedom and high performance.

Whatever your application, from simple pelleting to rate zonal separations, the Avanti JXN Series offers newfound momentum. Rely on the Avanti JXN-26 to boost your productivity, or reach speeds of up to 30,000 rpm with the Avanti JXN-30.

Flexibility reaches a whole new level with the MobileFuge remote application for Avanti centrifuges. Users can easily monitor and control centrifuge functions via computer, using Virtual Network Computing (VNC) software or mobile device using the custom MobileFuge app available for Apple® iOS and Android™ devices. Whether you are across the lab or across the campus, you can always keep an eye on your centrifuge. Work has never been so flexible.

1 Ergonomic design

- Low work surface height for easier installation and unloading of rotors
- Foot pedal for hands-free door operation
- Door swings up and out of the way for easy access to the rotor chamber
- Large digital readouts make operation simpler

2 Gain flexibility with MobileFuge

- Set and monitor run parameters and email diagnostic results
- Control and monitor the centrifuge from your Apple® iOS and Android™ device with MobileFuge
- Get alerts and diagnostics remotely

3 Intuitive interface

- User-friendly, large LCD screen
- View set and actual run conditions simultaneously
- Select rotor by name, not by arcane number code
- 11 accel/12 decel rates
- Delay start
- Run times to 99:59, Hold, and ω^2 integrator for applications that require exquisite reproducibility

4 Safe and sustainable

- Friction Reduction System (FRS) allows quicker, quieter, and cooler runs
- Uses less energy than traditional centrifuges
- BioSafe† options
- Dynamic rotor inertia check
- High-torque, Switched Reluctance (SR) drive cycle shortens cycle times*

5 Advanced, easy-to-use data management

- Perfect to support shared lab or GMP environments
- On-screen text sensitive “help” screen
- Up to 1,000 user-defined programs
- Set up and store numerous protocols
- Password protection for up to 50 unique user profiles
- Network multiple instruments
- Data logging and real-time run graphing

6 Versatile across rotors and applications

- Compatible with an extensive library of rotors
- Fixed-angle and swinging bucket options available
- Fully compatible with lightweight J-Lite rotors
- Dynamic Rotor Inertia Check (DRIC) and rotor recognition provide redundant safety checks to assure no rotor can be run above its rated speed
- Temperature control is optimized ensuring sample quality and avoiding unwanted artifacts
- SW and FA rotors capable of greater than 100,000 x g

a: Proprietary algorithm applied to provide an estimated sample temperature.

b: To reach temperatures above ambient, the centrifuge is dependent on the frictional heat generated inside the chamber during operation. At low run speeds or low ambient temperatures, the centrifuge may not be able to achieve some higher temperatures.

c: JA-20 rotor running at 20,000 rpm at 4°C .

d: JA-30.50 Ti rotor with chamber precooled and running at 26,000 rpm.

* SR drives are manufactured by Beckman Coulter, Inc. with technology licensed from Switched Reluctance Drives Limited.

**Availability varies by geography. Contact your local sales representative to determine the correct part numbers for ordering.

[†] BioSafe is a term intended to describe the enhanced biocontainment features of our products.

High Performance Centrifugation

1

Avanti J-26S XP Series High Performance Centrifuge

One instrument with many possibilities.

The Avanti J-26S combines high performance, complete BioSafety* systems and long-term durability, making it an incredibly capable choice for any lab environment. Along with high speed, it offers low heat output, imbalance tolerance and low noise.

Versatility is delivered by a vast range of separations. Plus, ergonomic design features, such as lower instrument height and hand-free door operation, makes it easy to use. For extra peace of mind, the Avanti J-26S has an impact-resistant lid, a full containment barrier and automatic rotor identification.

Specifications

Maximum Speed/g-Force	26,000 rpm / 81,800 x g
Maximum Capacity	6 Liters
Speed Control	Low Speed ± 10 rpm of set speed High Speed $\pm 0.1\%$ rpm of set speed
Set Temperature	-10°C to 40°C in 1° increments
Temperature Control	$\pm 2^{\circ}\text{C}$ of set temperature
Ambient Operating Range	16°C to 38°C
Accel / Decel Profiles	2 / 3
Heat Output	6900 BTU/hr (2.0 kW)
Drive Type / Cooling	SR** drive / Air-cooled
Refrigeration	Non-CFC, non-ozone depleting refrigerant
Sound Level	57 dBA (0.91 m / 3 ft from instrument at maximum speed)
Sterile Filter	Available
Dimensions (with door closed)	71 W x 86 D x 86 H cm (28 W x 34 D x 34 H in)
Weight	290 kg (640 lbs)
User-Defined Programs	None
Time Settings	1 to 180 minutes, Hold
Delayed Start	No
Key Lock-Out	No

High Performance Centrifugation

1

Avanti J-E High Performance Centrifuge

Compact High Performance Centrifuge that fits directly in your lab

Whether your application is related to cellular, genetic, or protein analysis, the Avanti J-E with speeds up to 21 000 rpm (53 300 x g) coupled with powerful SR* drive technology provides you with fast separations.

A comprehensive line of labware, with up to twenty-four 96-well microtiter plate processing, 4 x 1L bottles, and HarvestLine System Liners extend the versatility of this centrifuge. For clinical research applications, conical tubes and bottles for swinging bucket rotors spin volumes of 15, 50, 250, and 500 mL for effective blood component isolation with a variety of gradient kits.

The J-E is energy efficient for low heat output plus the quiet operation ensures a comfortable, productive work environment.

Avanti J-E High Performance Centrifuge

Specifications

Maximum Speed	21 000 rpm
Maximum g-force	53 300 x g
Speed Control	Actual rotor speed, $\pm$ 50 rpm of set speed
Drive Type	Switched Reluctance Drive*
Drive Cooling	Air-cooled
Centrifuge Warranty	1 year
Drive Warranty	2 years
Refrigeration System	Non-CFC, non-ozone-depleting refrigerant
Max. Capacity Volume	4 000 mL
Ambient Temperature Range	15° to 35°C
Set Temperature Range	-10° to 40°C in 1° increments
Temperature Control	$\pm$ 2°C of set
Time Setting	1 min. to 99:59 hours, hold
Acceleration/Deceleration Rates	2 accel/3 decel
Heat Output	2.0 kW (6 900 BTU/hr)
Sound Level	< 64 dBA (3 ft. from instrument at maximum speed)
Dimensions	63.5 cm x 80 cm x 91.4 cm (25 in. W x 31.5 in. D x 36 in. H)
Weight	267.4 kg (589 lb)

* Manufactured under license from Switched Reluctance Drives Limited, Harrogate, UK.

High Capacity Centrifugation

1

J6-MI High Capacity Centrifuge

It Spins Volumes

With six-liter capacity and an innovative range of rotors, carriers, and adapters, this centrifuge can handle multiple high-capacity applications. Ideal for bioprocessing, clinical and blood sample preparation, the J6-MI is the standard for quiet and convenient operation.

Its self-balancing rotor system corrects for imbalances during a run, without shutdown. Its microprocessor-controlled induction motor provides high torque, fast acceleration, and long motor life. And the J6-MI generates speeds and forces up to 6 000 rpm and 6 840 x g.

Specifications

Maximum Speed	6 000 rpm
Maximum g-force	6 840 × g
Speed Control	± 20 rpm of set speed
Drive Type	High-torque, variable-frequency induction motor
Drive Cooling	Indirect drive system
Refrigeration System	Non-CFC, non-ozone-depleting refrigerant
Max. Capacity Volume	6 Liters
Ambient Temperature Range	15° to 35°C
Set Temperature Range	–20°C to 40°C in 1° increments
Temperature Control	± 2°C of set temperature after equilibration
Ambient Operating Range	16°C to 38°C
Acceleration/Deceleration Rates	9 accel/9 decel
Heat Output	< 7000 BTU/hr (1.9 kW)
Sound Level	< 68 dBa (0.91 m/3 ft. from instrument at maximum speed)
Dimensions	71 cm x 84 cm x 91 cm (25 in. W x 33 in. D x 36 in. H)
Weight	252 kg (555 lb)

Note: Only values with tolerances or limits are guaranteed data. Values without tolerances are informative data, without guarantee.

High Capacity Centrifugation

1

Avanti J-HC Centrifuge

The capacity to impress.

The Avanti J-HC High Capacity Centrifuge provides you with a complete solution for batch bioprocessing. A maximum of 9 liters can be spun at speeds of 5 000 rpm and $7\,480 \times g$ for greater sample throughput. This allows processing of up to 36 liters per hour when harvesting bacteria. Enhanced operator safety is provided with disposable HarvestLine System Liners.

Avanti J-HC High Capacity Bioprocessing Centrifuge System

Specifications	
Maximum Speed	10 000 rpm
Maximum <i>g</i> -force	17,100 × <i>g</i> (JA-10 rotor @ 10 000 rpm)
Speed Control	± 25 rpm of set speed
Max. Capacity	9 000 mL
Single Bucket Volume	2 250 mL
Set Temperature Range	-10° to 40°C
Temperature Control	± 2°C
User Defined Programs	Up to 30 two-step programs
Friction Reduction	Automatic
Maximum Heat Dissipation to Room	2.0 kW (6 900 BTU/hr)
Noise Level	60 dBa (3 ft. from instrument at 10 000 rpm)
Weight	300 kg (660 lb)
Dimensions	71 cm x 86 cm x 86 cm (28 in. W x 34 in. D x 34 in. H)

†This rotor was tested to demonstrate containment of microbiological aerosols under normal operating conditions of the associated Beckman Coulter centrifuge, when used and maintained as instructed. Validation of the microbiological containment was done at an independent, third-party facility (CAMR, Porton Down, UK or USAMARIID, Ft. Detrick, MD, USA). Improper use or maintenance may affect seal integrity and, thus, containment.

JS-4.2/SMA**	366670	4 200	2 290	4 900		6 Blood Bags 18 Microplates		2:30	Separation of serum from whole blood, blood component separation.
JS-4.0	339086	4 000	1 540	4 050	15 296	4 x 000 97 x 167 (3.82 x 6.57 in.)	4 L	2:00 ^b	Rapid sedimentation of protein precipitates, large particles, cells and cell debris, as well as binding studies and separating serum from whole blood.
JS-3.0*	339086	3 000	1 150	2 560		6 x 1000 97 x 167	6L		
Continuous-Flow Rotor									
JCF-Z	335140 (standard core)	20 000	32 000	39 900	100	N/A	660 mL		Purification of viruses and/or concentration of large volumes of solution. Pelleting or sedimenting on a sucrose cushion. Maximum pellet size: 400 mL.
	357544 (small pellet core)	20 000	23 300	36 300	281	N/A	240 mL		Pelleting liquids that contain a low ratio of solids—such as bacterial cultures, or water containing clay particles or algae. Maximum pellet size: 200 mL.
	336283 (large pellet core)	20 000	22 850	39 900	293	N/A	1 250 mL		Pelleting solutions that have high solid-to-water ratios as high as 1:2 slurries. Maximum pellet size: 800 mL.
Zonal Rotor									
JCF-Z	354006	20 000	9 000	39 900	710	69 mm	1 900 mL		Fast start up. Dynamic loading and unloading. Isopycnic banding, linear, and discontinuous gradients. Subcellular fractions from tissue homogenates, algae, and chloroplasts.
Reorienting Gradient Rotor									
JCF-Z	354005	20 000	11 650	39 900	779	63 mm	1 750 mL		No rotating seal. Static loading and unloading. Gradient reorients in rotor. Especially useful for fragile material such as DNA strands.
Elutriation									
JE-5.0	356900	5 000	2 410	4 700	6 785	—	40 mL		The counterflow centrifugation elutriation system is a gentle, yet powerful technique for harvesting large populations of living cells, resulting in high viability rates.

*JS-3.0 rotor is for use in Beckman Coulter J6 Series centrifuges only per IFU J6-TB-0075C.

**Only for J6.

Adapters

JLA-9.1000

4 x 1000 mL

JLA-9.1000

**Fixed-Angle Rotor, Aluminum**

Major applications: General purpose, large-volume processing, pelleting of bacteria, subcellular organelles, viruses, and precipitates. Empty rotor weight is 23.9 lb (10.8 kg).

Max. RPM	Max. g	k Factor	Number of Tubes Volume/Size	Rotor Capacity
9 000	16 800	2 544	4 x 1000 mL 95 x 191 mm 3.8 x 7.65 in.	4 L

For use in Avanti J Series centrifuges.

No. 366754. J-LITE JLA-9.1000 Rotor Package. Includes rotor body, lid, carbon fiber canisters, and labware kit 392574.

No. 969330. J-LITE JLA-9.1000 Rotor Package. Includes rotor body, lid, carbon fiber canisters, labware kit 392574, and 4 polycarbonate bottles with cap assemblies (two A98812).

No. 969331. J-LITE JLA-9.1000 Rotor Package. Includes rotor body, lid, carbon fiber canisters, labware kit 392574, and 4 polypropylene bottles with cap assemblies (two A98813).

Polypropylene	50.0	357005	25	29 x 104	356996/363683**	1	—	—	9 000

* Bottle assemblies include cap/closure. The cap/closure serves the dual purpose of sealing the bottle and providing a secondary seal on the carbon-fiber canister to minimize sample loss resulting from bottle leak or failure.

† PC-1000 must be run with cap/closure; minimum fill volume is 500 mL.

‡ PP-1000 must be run with cap/closure; minimum fill volume is 1000 mL.

** These adapters fit inside one another to accommodate smaller bottles and tubes.

**Patented HarvestLine System Liners**

Disposable liners provide easy-to-use, low-cost sample containment, and storage

Labware Kit Part Number 392574

Includes: 1 ea. 974627 Bottle Rack (holds 6 bottles)
1 ea. 363646 Spatula
1 ea. 366770 Tool Kit

Accessories

974627 Bottle Rack (holds 6 bottles for easy transport)
363646 Spatula
A99028 Polyphenylsulfone Cap/Closure Assembly (set of 2)
(Includes cap/closure, O-ring, plug, and plug O-ring)
B29895 Polyphenylene Sulfide Cap/Closure Assembly (set of 2)
(Includes cap/closure, O-ring, plug, and plug O-ring)
393898 Plug Assembly, AutoVent Polycarbonate (set of 2)
366749 Plug Assembly, AutoVent polyetherimide (PEI)(set of 2)
366770 Tool Kit (includes one bottle grip and one wrench)
366772 Polytetrafluoroethylene (PTFE) Spray
369264 HarvestLine System Liner Kit
(Includes 369256 one-liter bottle liners (qty 120), 368740 filling rack, 977472 funnel, and 369267 instructional CD.)
369256 HarvestLine System Liners
Fits JLA-8.1000 or JLA-9.1000 one-liter bottles (qty. 120).

Rotor Replacement Parts

363583 Rotor Lid Assembly
363686 J-LITE 1000 Removable Canister (set of 2)
363601 Canister Sleeve Washer (set of 6)
B10317 Polyphenylsulfone Cap/Closure Replacement Assembly (set of 6)
B29894 Polyphenylene Sulfide Cap/Closure Replacement Assembly (set of 6)
B10319 Cap/Closure Replacement O-rings (set of 6)
B10320 AutoVent Plug Replacement O-rings (set of 6)
Includes six large plug O-rings and six AutoVent plug O-rings.

JS-7.5

4 x 250 mL

JS-7.5

1

**Swinging-Bucket Rotor, Aluminum**

Major applications: Initial processing of cells and removal of cell debris from culture media.

Max. RPM	Max. <i>g</i>	<i>k</i> Factor	Number of Tubes Volume/Size	Rotor Capacity
7 500	10 400	5 287	4 x 250 mL 62 x 136 mm 2.5 x 5.5 in	1 L

*For use in Avanti J Series centrifuges
(except Avanti J-E).*

No. 336380. JS-7.5 Swinging-Bucket Rotor for 7 500 rpm operation. Includes four 250-mL buckets. Multitube carriers available separately. Tubes and bottles not included.

No. 362212. JS-7.5 Rotor without buckets.

Multitube Carriers

For added versatility, three Multitube Carriers are available for the JS-7.5 Rotor. These Carriers require no adapters to accommodate 50-mL conical tubes, 50-mL round-bottom tubes, and 5-mL round-bottom tubes. Multitube carriers are interchangeable with the buckets of the JS-7.5 Rotor.

50-mL Conical Tube Carrier

No. 362213. Multitube Carrier for 50-mL conical tubes. Holds three tubes per carrier for maximum rotor capacity of 12 x 50-mL conical tubes. Set of two.

Major applications: General-purpose pelleting (especially of cells), as well as nucleic acid precipitations and isolation of mononuclear cells using Ficoll-Paque.

Max. RPM	Max. <i>g</i>	<i>k</i> Factor	Number of Tubes Volume/Size	Rotor Capacity
7 500	10 580	4 140	12 x 50 mL (conical) 29 x 103 mm 1.125 x 4 in	600 mL

50-mL Round-Bottom Tube Carrier

No. 362214. Multitube Carrier for 50-mL round-bottom tubes. Holds four tubes per carrier for maximum rotor capacity of 16 x 50-mL tubes. Set of two.

Major applications: General-purpose centrifugation.

Max. RPM	Max. <i>g</i>	<i>k</i> Factor	Number of Tubes Volume/Size	Rotor Capacity
7 500	10 080	3 959	16 x 50 mL 29 x 104 mm 1.125 x 4 in	800 mL

Swinging-Bucket Rotor, Anodized Aluminum

Major applications: Rapid sedimentation of protein precipitates, large particles, cells, and cell debris. It can be used for binding studies and separating serum from whole blood.

Max. RPM	Max. g	Number of Tubes Volume	Rotor Capacity
5 300	6 870	4 x 500 mL	2 L
5 300	6 130	24 microplates	2 L
		8 deep-well microplates	

For use in Avanti J-E and J-26S centrifuges only.

No. 368690. JS-5.3 Swinging-Bucket Rotor. Four-place rotor with anodized aluminum buckets designed for use with adapters to accommodate a wide range of tubes and bottles. Rotor buckets are interchangeable with microplate carriers. Includes tie-down knob.

No. 969314. JS-5.3 Swinging-Bucket Rotor Package. Includes rotor, buckets, tie-down knob, and microplate carrier kit (368914).

Microplate Carrier Kit

No. 368914. Microplate Carrier Kit. Includes 4 carriers (368905) and 4 support pads (369382).

Replacement Parts for Microplate Carriers

369382	Support Pads (set of 4)	
368914	Microplate Carrier (set of 4)	
368417 [§]	Aeroseal Covers for JS-5.3 AllSpin Rotor (set of 2)	BIOC
368706	Bucket Upgrade Kit (set of 4 blue buckets) ^{***}	

Tubes and Bottles

50 mL conical	356966 (each)	Yellow	1	6 670	5 300 [™]

* Maximum RCF and speed for adapters. Use manufacturers' recommendations for tube and bottle limits.

** Use this adapter inside the 250-mL adapter (392077)

*** Rotors with black buckets require Bucket Upgrade Kit 368706

† Maximum RCF for labware tested in this adapter is 4 000 x g. Use manufacturers' recommendations for max g-force.

‡ Requires a cushion (356983) to be placed at bottom of adapter.

◇ When used with optional Aeroseal Covers, P/N 368417.

£ Cannot be used with bucket cover

* When used with optional Aeroseal Covers, P/N 343686.

** These adapters fit inside one another to accommodate smaller bottles and tubes.

§ This rotor was tested to demonstrate containment of microbiological aerosols under normal operating conditions of the associated Beckman Coulter centrifuge, when used and maintained as instructed. Validation of microbiological containment was done at an independent, third-party facility (CAMR, Porton Down, UK or USAMRIID, Ft. Detrick, MD, USA). Improper use or maintenance may affect seal integrity and, thus, containment.

Adapters

Blood-Bag Cups

No. 339127. Yellow cup with inner diameter of 88 mm for single- and double-packs. Set of four.

No. 339129. Red cup with inner diameter of 98 mm for triple- and quad-packs. Sold individually.

Aerosol Covers [§]

No. 343686. Cover for round buckets of JS-5.2. Features O-ring seal to provide added aerosol protection. Transparent so broken tubes can be detected and proper precautions taken before breaking seal. Quantity 1.

Microplate Carriers

No. 358680. Special carriers, interchangeable with buckets, slip onto yoke of JS-5.2 Rotor. Each carrier holds three microplates for a total capacity of 12 per run. Maximum speed 2 600 rpm (1450 x g). Set of two.

[§] Validation of microbiological containment was done at an independent, third-party facility (CAMR, Porton Down, UK or USAMRIID, Ft. Detrick, MD, USA). Improper use or maintenance may affect seal integrity and, thus, containment.

1

Swinging-Bucket Rotor, Anodized Aluminum

Major applications: Rapid sedimentation of protein precipitates, large particles, cells, and cell debris. It can be used for binding studies and separating serum from whole blood.

Max. RPM	Max. g	k Factor	Number of Tubes Volume/Size	Rotor Capacity
4 300	4 220	11 800	4 x 750 mL 96 x 130 mm 3.8 x 5.2 in	3 L

For use in Avanti J-26 XP Series.

No. 362734. JS-4.3 Swinging-Bucket Biosafety Rotor. Four-place rotor with anodized aluminum buckets designed for use with modular disk adapters to accommodate a variety of tubes (as indicated in the chart below) and other adapters and blood bag cups. Can be used with Beckman Coulter

Bucket Covers

No. 361264. Set of two. Transparent bucket covers for JS-4.3 Buckets to contain broken tubes. Includes gasket and clips.

Aerosolve Canisters

BIO C No. 359232. Set of four.

BIO C No. 359481. Set of two.

Aerosolve Canisters fit in JS-4.3 Rotor Buckets. These canisters feature an O-ring seal and are completely transparent so a broken tube can be seen and proper precautions taken before the seal is broken. Canisters can also be used as 500-mL wide-mouth bottles. Specially-designed adapters accommodate most popular tubes within the canister (see table at end of this rotor section).

Aerosolve Canisters which are designed to provide added protection from aerosols. Rotor buckets are interchangeable with microplate carriers.

** These adapters fit inside one another to accommodate smaller bottles and tubes.

Blood-Bag Cups

No. 339127. Yellow cup with inner diameter of 88 mm for single- and double-packs. Set of two.

No. 339129. Red cup with inner diameter of 98 mm for triple- and quad-packs. Sold individually.

**Aerosol Covers[§]**

No. 343686. Cover for round buckets of JS-4.2. Features O-ring seal to provide added aerosol protection. Transparent so broken tubes can be detected and proper precautions taken before breaking seal. Quantity 1.

**Microplate Carriers**

No. 358682. Special carriers, interchangeable with buckets, slip onto yoke of JS-4.2 Rotor. Each carrier holds three microplates for a total capacity of 18 per run. Max. speed 2 500 rpm, max RCF 1 500 x g. Set of two.

[§] Validation of microbiological containment was done at an independent, third-party facility (CAMR, Porton Down, UK or USAMRIID, Ft. Detrick, MD, USA). Improper use or maintenance may affect seal integrity and, thus, containment.

Blood-Bag Cups

No. 339127. Yellow cup with inner diameter of 88 mm for single- and double-packs. Sold individually.

No. 339129. Red cup with inner diameter of 98 mm for triple- and quad-packs. Sold individually.

**Aerosol Covers§**

No. 343686. Cover for round buckets of JS-4.2A. Features O-ring seal to provide added aerosol protection. Transparent so broken tubes can be detected and proper precautions taken before breaking seal. Quantity 1.

**Microplate Carriers**

No. 358682. Special carriers, interchangeable with buckets, slip onto yoke of JS-4.2A Rotor. Each carrier holds three microplates for a total capacity of 18 per run. Max. speed 2 500 rpm. Set of two.

§ Validation of microbiological containment was done at an independent, third-party facility (CAMR, Porton Down, UK or USAMRIID, Ft. Detrick, MD, USA). Improper use or maintenance may affect seal integrity and, thus, containment.

Adapters

JS-4.2SM

6 x Quad Blood Bag Packs

JS-4.2SM

Swinging-Bucket Rotor (Windshielded),
Anodized Aluminum

Major applications: Separation of serum or plasma from whole blood, blood component separation.

Max. RPM	Max. g	Rotor Capacity	Approximate Accel/Decel Time (min:sec)
4 200	4 900	6 Blood Bags 18 Microplates	2:30/3:00

For use in J6-MI centrifuge only.

No. 348394. JS-4.2SM Swinging-Bucket Rotor. Windshielded, six-place rotor designed with oval-shaped buckets specifically for blood bank applications which utilize similarly shaped blood bags. Buckets are interchangeable with microplate carriers for blood serum studies. Includes six oval-shaped blood-bag cups.

Microplate Carriers

No. 358682. Special carriers, interchangeable with buckets, slip onto yoke of JS-4.2SM Rotor. Each carrier holds three microplates for a total capacity of 18 per run. Maximum speed 2 500 rpm. Set of two.

Blood-Bag Cups

No. 363651. Oval-shaped gray cup for quad-packs (filters). Set of two.

JS-4.2SMA

1

Swinging-Bucket Rotor (Windshielded),
Anodized Aluminum

Major applications: Separation of serum or plasma from whole blood, blood component separation.

Max. RPM	Max. g	Rotor Capacity	Approximate Accel/Decel Time (min:sec)
4 200	4 900	6 Blood Bags	2:30/3:00

For use in J6-MI centrifuge only.

No. 366670. JS-4.2SMA Swinging-Bucket Rotor. Windshielded, six-place rotor designed with oval-shaped buckets specifically for blood bank applications which utilize similarly shaped blood bags. Buckets are interchangeable with microplate carriers for blood serum studies. Includes six oval-shaped blood-bag cups. ARIES “Smart Balance” technology provides imbalance compensation for rotors with buckets that are unbalanced up to 100 grams.

Microplate Carriers

No. 358682. Special carriers, interchangeable with buckets, slip onto yoke of JS-4.2SMA Rotor. Each carrier holds three microplates for a total capacity of 18 per run. Maximum speed 2 500 rpm. Set of two.

Blood-Bag Cups

No. 363651. Oval-shaped gray cup for quad-packs (filters). Set of two.

JS-4.0

BIO C *

4 x 1000 mL

JS-4.0

**Swinging-Bucket Rotor (Unshielded), Aluminum**

Major applications: Rapid sedimentation of protein precipitates, large particles, cells, and cell debris. It can be used for binding studies and separating serum or plasma from whole blood.

Max. RPM	Max. g	Rotor Capacity	Approximate Accel/Decel Time
4 000	4 050	4 Liters, 4 Blood Bags, 12 Microplates, 148 RIA Tubes	2:00/1:30 min.

For use in Avanti J-26S and J6-MI centrifuges.

No. 339086. JS-4.0 Swinging-Bucket Biosafety Rotor. Unshielded, four-place rotor with aluminum rotor yoke and removable aluminum swinging buckets. Buckets are interchangeable with Microplate Carriers

for spinning microtiter plates and MiniTube Racks.

Note: requires tie-down kit P/N 367045 for use with Avanti J-26S Series centrifuges.

Adapters

Blood-Bag Cups

No. 339127. Yellow cup with inner diameter of 88 mm for single- and double-packs. Sold individually.
No. 339129. Red cup with inner diameter of 98 mm for triple- and quad-packs. Sold individually.

Aeroseal Covers **BIOC**

No. 343686. Cover for round buckets of JS-3.0. Features O-ring seal to provide added aerosol protection. Transparent so broken tubes can be detected and proper precautions taken before breaking seal. Quantity 1.

Microplate Carriers

No. 358682. Special carriers, interchangeable with buckets, slip onto yoke of JS-3.0 Rotor. Each carrier holds three microplates for a total capacity of 18 per run. Max. speed 2 500 rpm, max RCF 1 500 x g. Set of two.

Rotor Replacement Parts

| 368575 | Buckets (set of 6, blue-anodized) |

How To Order the JCF-Z Rotor

For a complete Beckman Coulter JCF-Z Rotor system, the following components are required.

1. A JCF-Z Rotor (choose according to application; continuous flow, zonal, or reorienting gradient).
2. Optional high-flow seal assembly for processing up to 100 liters/hour.
3. An appropriate bracket assembly (for Avanti J Series instruments only).
4. A pump system (not supplied by Beckman Coulter, but recommendations below).
5. A Beckman Coulter Avanti J Series centrifuge (excluding J-E).

Continuous-Flow Rotors

No. 335140. JCF-Z Continuous-Flow Rotor, Titanium, Standard Pellet Core. Includes Standard continuous-flow core (pellet size 400 mL), standard-flow rotating seal assembly, and tool kit. Bracket kit required for use with Avanti J Series centrifuges, and pump system required for all applications.

Max. RPM	Max. g	k Factor	Rotor Capacity
20 000	39 900	100	660 mL

No. 357544. JCF-Z Continuous-Flow Rotor, Titanium, Small Pellet Core. Includes Small Pellet continuous-flow core (pellet size 200 mL), standard-flow rotating seal assembly, and tool kit. Bracket kit required for use with Avanti J Series centrifuges, and pump system required for all applications.

Max. RPM	Max. g	k Factor	Rotor Capacity
20 000	36 300	281	240 mL

No. 357521. JCF-Z Continuous-Flow Rotor, Titanium, Large Pellet Core. Includes Large Pellet continuous-flow core (pellet size 800 mL), standard-flow rotating seal assembly, and tool kit. Bracket kit required for use with Avanti J Series centrifuges, and pump system required for all applications.

Max. RPM	Max. g	k Factor	Rotor Capacity
20 000	39 900	293	1 250 mL

Bracket Kits for use with Avanti J-Series centrifuges

No. 363843. Bracket Kit, for use with Avanti J-25 Series and Avanti J-301 centrifuges, and standard Cole-Parmer size-16 tubing (6.4 mm, 1/4-in. O.D.). For other size tubing, see optional kits below.

No. 366431. Bracket Kit, for use with Avanti J-26 XP Series centrifuges, and standard Cole-Parmer size-16 tubing (6.4 mm, 1/4-in. O.D.). For other size tubing, see optional kits below.

No. 363844. Size-14 Tubing Adapter Kit, for use with Cole-Parmer size-14 tubing (4.8 mm, 3/16 in.). Order in addition to one of above Bracket Kits.

No. 363845. Size-15 Tubing Adapter Kit, for use with Cole-Parmer size-15 tubing (9.5 mm, 3/8 in.). Order in addition to one of above Bracket Kits.

Recommended Pumps

The chosen pump must meet the following requirements: (a) has a continuously adjustable flow rate from 6 to 100 mL/min; (b) has a flow rate controllable to within $\pm 1.5\%$; (c) has a flow rate independent of back pressure up to 40 psi; and (d) has pulsation less than 5% of flow rate.

We recommend Cole-Parmer Masterflex L/S Standard Digital Pump E-77921-00 (115 VAC), or L/S Standard Digital Pump E-77921-07 (230 VAC). These are not available from Beckman Coulter, but may be ordered direct from Cole-Parmer (625 East Bunker Court, Vernon Hills, Illinois 60061-1844 USA, Phone 847-549-7600, Fax 847-549-7676, TDD hotline: 800-833-7400, E-mail: info@coleparmer.com). Contact Cole-Parmer directly to receive current ordering information for these or comparable pumps.

These pumps include: Easy-Load[®] pump head model E-07518-12 (accepts L/S 15 and L/S 24 tubing), 10 ft. (3 m) of Tygon[®] LFL L/S 24 tubing model E-06429-24 (flow range of 28 to 1700 mL/min), and 10 to 600 rpm standard digital drive model E-07523-20 (115 VAC) or E-07523-27 (230 VAC).

Zonal and Reorienting Gradient Rotors

No. 354006. JCF-Z Zonal Rotor, Titanium.

Includes Zonal core, standard-flow rotating seal assembly, and tool kit. Bracket kit required for use with Avanti J Series centrifuges, and pump system required for all applications.

Max. RPM	Max. g	k Factor	Rotor Capacity
20 000	39 900	710	1 900 mL

No. 354005. JCF-Z Reorienting Gradient Rotor, Titanium.

Includes reorienting gradient core, sample transfer assembly, and tool kit. Bracket kit required for use with Avanti J Series centrifuges, and pump system required for all applications.

Max. RPM	Max. g	k Factor	Rotor Capacity
20 000	39 900	779	1 750 mL

Interchangeable Cores and Accessories

335130	Continuous-flow Core, Standard
350641	Continuous-flow Core, Large-Pellet
350601	Continuous-flow Core, Small-Pellet
335141	Zonal Core
343348	Zonal Keylock Switch for J2-21
350585	Reorienting Gradient Core and Sample Transfer Assembly
335142	Standard-flow, Rotating Seal Assembly required for Zonal- and Continuous-flow Operation
335134	High-flow Seal Assembly Kit: permits processing up to 100 liters/hour in Continuous-flow Core

JCF-Z-Rotor Replacement Parts

335144	Rotating Seal, Carbon-graphite
812715	O-ring for JCF-Z Rotor Plug (Min. order 12)
815473	O-ring for JCF-Z Rotor Lid Stem, $\frac{3}{8}$ " O.D. (Min. order 6)
824412	O-ring for JCF-Z Rotating Seal, $\frac{3}{4}$ " O.D. (Min. order 6)
854519	O-ring for bottom of JCF-Z-Rotor Bowl (Min. order 6)
366190	Bearing, Stainless Steel
870655	O-ring for JCF-Z Rotating Seal, .502 O.D. (Min. order 6)
870688	O-ring for JCF-Z Rotor Lid, 7.188 O.D.
335143	Tool Kit

For use in Avanti J Series centrifuges (except Avanti J-E).

1

Many of the parts on this list are pictured for easy identification.

Supply List

336079	Bearing Housing (anodized aluminum)
366190	Bearing (stainless steel)
336285	Bearing Spacer (stainless steel)
350585	Reorienting Gradient Core and Sample Transfer Assembly
335136	Feed Fitting, High-flow (stainless steel)*
335146	Feed Fitting, Standard-flow (stainless steel)*
344108	Fitting Retaining Clamp (modified polyphenylene oxide)
338672	Housing, High-flow Stationary Seal (stainless steel)
336080	Housing, Standard-flow Stationary Seal (stainless steel)
336284	Mount, Rotating Seal (stainless steel)
870526	O-ring, Continuous-flow Lid
817033	O-ring, (Viton ¹³), Continuous-flow Lid
824412	O-ring, Rotating Seal
824464	O-ring, Seal Housing Feed Fitting
870656	O-ring, (Viton ¹³), Transfer Tube Assembly
870315	O-ring, Zonal Lid
870689	Retaining Ring (stainless steel)
335120	Sample Transfer Tube, Standard-flow Seal Assembly (stainless steel)
335132	Sample Transfer Tube, High-flow Seal Assembly (stainless steel)
336286	Scavenger Drain Tube (stainless steel)
804063	Screw (stainless steel)
870690	Screw (stainless steel)
335133	Seal Assembly, High-flow
335148	Silicone Vacuum Grease
339555	Solution 555 Rotor Cleaning Concentrate
306812	Spinkote Lubricant
870654	Spring (stainless steel)
335145	Stationary Seal (ceramic)
336403	Stoppers for Tubing Lines (#1, one-hole)
306653	Tygon Tubing
878279	Washer, Flat (nylon)
853118	Washer, High-flow Seal
853391	Washer, Flat (stainless steel)
870658	Washer, Spring (spring steel)

* Use Loctite grade "T" primer and #35 retaining compound to bond fitting to seal housing.

Seal Assembly
(all other cores)

Transfer Assembly
(reograd only)

Seal and Transfer Assemblies

Note: Standard-flow Manifold consists of part numbers 870690, 853118, 336080, 870655, 868638, and 335145. High-flow Manifold is part of High-flow Seal Housing Assembly, which consists of part numbers 870690, 853118, 338672, 2 x 335136, and 336286.

**Elutriator Rotor**

For use in Avanti J-26S XP Series and J6-MI centrifuges equipped with viewport door and strobe assembly.

Max. RPM	Max. g	Maximum Volume	Elutriation Boundary
5 000	4 700	40 mL	86 mm (2,410 g)

*For use in Avanti J-26S XP centrifuge.**

No. 356900. JE-5.0 Elutriator Rotor Assembly. Includes bypass chamber and supplies, and features a quick-release assembly which can be autoclaved for sterile operation. Order elutriation chamber(s) separately. (For complete Elutriation System, a number of components are necessary. See *How to Order* below.)

Elutriation Chamber

Description	Part No.	Max. Cells Recovered per Run	Minimum Cells Required for Loading per Fraction	Max Elutriated Buffer Volume
40-mL	356940	10^{10}	10^7	1000 mL
5-mL	356943	10^{10}	10^7	1000 mL
Sanderson	356945	10^{10}	10^5	1000 mL

How to Order

For a complete Beckman Coulter Elutriation System, the following components are required:

1. An Elutriator Rotor Assembly
2. An Elutriation Chamber
3. An Elutriation Centrifuge equipped with viewport door and strobe assembly.

Beckman Coulter Avanti J-26S XP centrifuges can be ordered as Elutriation Centrifuges fully equipped with the appropriate door and strobe assembly. See Section 1 for ordering information.

Also necessary but not available from Beckman Coulter is a pump that meets the following requirements: (a) has continuously adjustable flow rate from 6 to 100 mL/min; (b) has flow rate controllable to within $\pm 1.5\%$; (c) has flow rate independent of back pressure up to 40 psi; and (d) has pulsation less than 5% of flow rate. Recommended pumps are listed below.

To Upgrade an Existing Beckman Coulter Centrifuge

For Avanti J-26S XP Series, order the appropriate kit listed below (order only one kit):

No. 366562. 50/60 Hz. For use with Avanti J-26S XP. Kit includes Strobe Lamp/Control Assembly and Door Assembly with Viewport.

Recommended Pump (not supplied by Beckman Coulter)

We recommend the Cole-Parmer Masterflex Digital Drive Pump System. These are not available from Beckman Coulter, but may be ordered directly from Cole-Parmer (625 East Bunker Court, Vernon Hills, Illinois 60061-1844 USA, Phone 847-549-7600, Fax 847-549-7676, TDD hotline: 800-833-7400, E-mail: info@coleparmer.com). Contact Cole-Parmer directly to receive current ordering information for these or comparable pumps.

A complete pump consists of one each of the following components:

1. Easy-Load pump head (stainless steel)
2. Tygon L/S 16 tubing standard drive (10 to 600 rpm, 115 VAC or 230 VAC)

Supplies

335148	Silicone Vacuum Grease, 1 oz
339555	Solution 555 Cleaning Concentrate, 1 qt
306812	Spinkote Lubricant (for rotor/shaft interface), 2 oz
357520	Tubing, Tygon 1/8-in. (I.D.) $\times$ 1/4-in. (O.D.)
357580	Tubing, Silicone 3/16-in. (I.D.) $\times$ 5/16-in. (O.D.) (for rotating seal-assembly connection)

Tools

927784	Pliers for Retaining Clip (bearing removal)
016223	Wrench, 1/8-in. Hex Driver
927766	Wrench, 5/16-in. Hex T-handle
029840	Wrench, 5/32-in. Hex Driver
001884	Wrench, 5/64-in. Hex Driver
817305	Wrench, 9/64-in. Hex Angle

* When properly equipped for elutriation.

Replacement Parts

358291	Quick-release Seal Assembly 5.0 with counterbalance
366922	Anchor Cable Assembly for Avanti J-26 XP Series centrifuge
358182	Anchor Cable Assembly for J6-MI centrifuge
355161	Ball Bearing, S.C.D.
356014	Cable Retainer
356940	Chamber, Large (40-mL), "A"
356941	Chamber, Large (40-mL), "B"
356943	Chamber, Standard (5-mL), "A"
356944	Chamber, Standard (5-mL), "B"
356945	Chamber, Sanderson (5-mL), "A"
356946	Chamber, Sanderson (5-mL), "B"
849660	Chamber Mounting Nut
356917	Chamber Pad
356907	Chamber Gasket, 40-mL
356935	Chamber Gasket, 4-mL
359399	Chamber Gasket, Sanderson, 4-mL
356930	Chamber Mount
356921	Chamber Tube (solid)
356942	Counterbalance
927768	Fitting, Inlet Line (to seal assembly), $\frac{3}{16}$ in. I.D.
000148	Fuse, Strobe, 1.0 A-TD 250 VAC
870671	Glass Plate for Lapping Seal (4 x 5 in.)
356912	Housing, Bearing
356911	Housing, Seal
870655	O-ring, Small, Seal Housing
011519	O-ring, Small, Bearing Shaft
868638	O-ring, Large, Seal Housing
853984	O-ring, Center Tube
853696	O-ring, Retaining, Center Tube
010426	O-ring, Transfer Tube
356910	Plate, Chamber/Seal Support
340148	Pressure Gauge Assembly
347549	Reflector, rpm
878681	Retaining Clip, Bearing Assembly
356915	Retaining Plate, Transfer Tube
927286	Retaining Ring, Internal
335213	Sample Reservoir, 30-mL
335197	Sample Reservoir, 75-mL
803993	Screw, Cap (support plate to seal housing)
927569	Screw, Cap (retaining plate)
841717	Screw, Chamber Mounting
824905	Screw, Housing
929279	Screw, Shoulder (chamber assembly)
347526	Seal, Rotating, Black
335145	Seal, Stationary, White
347543	Syringe Assembly
356913	Shaft (bearing)
357459	Spacer (spring/seal)
340145	Spring (seal assembly)
356920	Tube, Long
356919	Tube, Short
356914	Tube, Transfer
870669	Valve, Stopcock (3-way)
021623	Washer, Flat (bearing housing to support plate)
887438	Washer, Flat (bearing housing to support plate)
889303	Washer, Flat (seal housing)
927730	Washer, Spring (retaining plate)
927731	Washer, Spring (support plate to seal housing)
852685	Washer, Spring (bearing assembly, 3 required)
878475	"Y" Hose Fitting
347978	Flash Tube

Tubes and Bottles

2

Tubes and Bottles for Every Application

No single tube design or material will meet all application requirements. A number of factors should be considered when a supply of tubes is ordered: the particular technique to be used, the nature of the sample and any solvent or gradient media, the desirability of reusing the tubes, and certain convenience factors. The properties listed below provide a guide for anyone involved in the tube selection process.

- **Strength and Flexibility**, to resist permanent deformation even when run in fixed angle rotors without tube caps
- **Chemical Resistance** to a wide range of bases, acids, and solvents
- **Transparency** to permit a clear view of fractions and bands after centrifugation
- **Thin enough** to be sliced or punctured after centrifugation for fraction collection
- **Impermeable to Water** to prevent aqueous solutions from permeating the tube wall and reaching the rotor cavity
- **Surface Properties** that prevent the adherence of nucleic acids and proteins
- **Temperature Tolerance** throughout a wide range of operating temperatures, without deforming at high temperatures or cracking when used close to 0°C
- **Autoclavable** for convenient sterilization and reuse
- **Contaminant-free** to avoid leaching extraneous materials into the sample, especially materials visible in the sensitive 240-280 nm range
- **Odor-free** for pleasant handling

The full line of Beckman Coulter tubes includes a number of tube materials, each with its own distinct combination of properties to meet a variety of application requirements. Available are transparent, translucent, and opaque tubes; tubes that can be sliced or punctured; tubes that can be sterilized and reused; and tubes that are resistant to a variety of chemical compounds.

Tubes and Bottles

Tube Selection Considerations

Compatibility of Tube Material with Solvents and Sample

The chemical compatibility of the tube materials with the gradient-forming medium or other solvent is a prime consideration. Neutral sucrose and salt solutions cause no problem. But alkaline solutions, such as those frequently used for the separation of single-stranded forms of DNA, cannot be used in Ultra-Clear tubes or polycarbonate tubes and bottles. Sometimes DMSO is used in preparation of sucrose gradients for sedimentation of denatured RNA. Polycarbonate and Ultra-Clear tubes are incompatible with DMSO, so polypropylene tubes should be used.

The last column of the “Quick Reference Chart to Tube Materials and Their Properties” on page 2-3 gives some guidelines to the chemical resistances of the various tube materials. It must be emphasized, however, that other conditions of centrifugation (g-force, duration of run, etc.) have considerable effect on how well a tube material will withstand a particular solvent. Beckman Coulter publication IN-175, “Chemical Resistances for Beckman Coulter Centrifugation Products” (found on the Beckman Coulter web site at www.beckmancoultercentrifugation.com) provides more detailed information about the chemical resistances of the various tube materials. The wisest course is to test any questionable combination under operating conditions before making the actual run.

The type of sample, in some cases, will affect selection of a specific tube material. DNA, in its denatured or single-stranded form, will adhere to the surface of some tube materials. Polypropylene would be the best choice. (Most of this work is done in highly alkaline media which are incompatible with polycarbonate.)

Lipoprotein separations are most often done in Ultra-Clear tubes because they are clear and sliceable; these properties simplify fraction location and recovery by tube slicing. When small lipoprotein samples are to be recovered by a fractionating device and clear tubes are desirable, there are alternatives: cellulose propionate, polycarbonate, and Ultra-Clear tubes.

Hazardous materials, either pathogenic or radioactive, should be centrifuged with extreme care. All possible precautions must be taken to avoid leakage of the sample into the rotor cavity during centrifugation.

To determine the optimum tube material for your specific sample and gradient medium, refer to the quick reference chart on page 2-4.

Gradient Formation and Fractionation

When choosing a tube for a density gradient run, some thought should be given to gradient formation and fractionation. If the bands or zones formed during centrifugation are indistinct, they may not be visible through a translucent material such as polypropylene. If optimum band visualization is important, Ultra-Clear tubes or tubes of polycarbonate or cellulose propionate should be used. Whenever collection of bands or zones must be done by puncturing the tube or slicing, a thin, flexible tube wall is required. Ultra-Clear or polypropylene tubes should be used, depending on the need for transparency.

As there are currently no wettable plastic centrifuge tubes available, gradients should be loaded into plastic tubes from the bottom up to avoid mixing.

High Temperature Centrifugation

Although modern centrifuges and rotors can operate at temperatures as high as 45°C, one cannot assume that every tube can be safely run over 25°C. Stainless steel and glass are the only materials which will not experience some deformation when subjected to high temperatures and long centrifugation times. Plastic tubes undergo some degree of softening at temperatures higher than 25°C. Whether or not this will cause permanent deformation is not a question of temperature alone. The centrifugal force field used, the duration of the centrifugation, the type of rotor, and even the tube angle all have an effect.

It's obviously impossible to give exact temperature limits for plastic tubes when so many other variables are involved. The safest policy is to pretest the tubes under the actual experimental conditions, but with water, rather than a valuable sample.

Tube Sizes

Tube sizes as indicated in the following charts are nominal sizes, and may vary somewhat from actual filling capacities. If a thickwall tube is run uncapped, the maximum filling volume will depend on the tube angle of the rotor to be used. See appropriate rotor instruction manuals for maximum filling levels of tubes.

Tube Cleaning, Sterilization, and Reuse

If tubes are to be reused, special care must be taken during cleaning and sterilization. All tubes can be washed by hand with a mild detergent such as Solution 555 diluted 5-to-1 or 10-to-1 with water. This is particularly important for polycarbonate tubes and bottles which should not be exposed to a detergent with a pH higher than 8. Tubes and bottles should not be washed in commercial dishwashers as the detergents and high temperatures are too harsh. Solvents such as alcohol or acetone react unfavorably with many tube materials. If an organic solvent must be used in the cleaning procedure, consult bulletin IN-175 for a table of tube material/solvent compatibilities (or review the same document on the Beckman Coulter web site at www.beckmancoultercentrifugation.com).

The method chosen for sterilization has direct bearing on the number of reuses one can expect from a tube. Tubes and bottles of polypropylene, polyethylene, and glass can all be autoclaved, although in general, cold sterilization methods are not as harsh as autoclaving. Cold sterilization is recommended for both polycarbonate and Ultra-Clear.

Tubes and Bottles

If maximum reuse is a major consideration, either polypropylene (preferably thickwall) or polycarbonate tubes and bottles should be selected, and cold sterilization methods used. If these tubes are run completely filled in swinging bucket rotors, most of them can be reused a number of times. Chances of permanent deformation will be greater whenever the tubes are run in fixed angle rotors, without caps, and/or partially filled. All of these conditions tend to stress the centripetal edge of the tube unduly. All tubes that have been used or autoclaved previously must be individually examined for signs of deformation or cracking before using them again.

Tube Closures

When other considerations have been resolved, convenience may be a deciding factor. Without a doubt, the most convenient tube closure is none at all; none are required for tubes run in swinging bucket rotors.

For tubes run in fixed angle rotors, alternatives to the standard tube cap assemblies are available. Bottles have three-piece cap assemblies which are easier to use than the more complex tube cap assemblies. Polycarbonate bottles are available for general-purpose fixed angle rotors, and are used frequently for differential centrifugation where band recovery is not a problem. Thickwall tubes can be run in all fixed angle rotors without caps, provided they are partially filled. (Refer to rotor manuals for more information on fill volumes.)

When closed tubes are required, Beckman Coulter offers some innovative and convenient options.

A Quick-Reference Chart to Tube Materials and Their Properties

Property	Thinwall Polypropylene	Thickwall Polypropylene	Ultra-Clear	Polycarbonate	Polypropylene	Polyethylene	Cellulose Propionate
Optical	transparent	translucent	transparent	transparent	translucent	transparent/translucent	transparent
Autoclaveable	yes	yes	no	yes**	yes	no	no
Puncturable	yes	no	yes	no	no	yes	no
Sliceable	yes	no*	yes	no	no*	no	no*
Reusable	no	yes	no	yes	yes	yes	no
Acids (dilute or weak)	S	S	S	M	S	S	S
Acids (strong)	U	S	U	U	S	S	U
Alcohols (aliphatic)	U	S	U	U	S	S	U
Aldehydes	M	M	S	M	M	S	U
Bases	S	S	U	U	S	S	U
Esters	U	M	U	U	M	S	M
Hydrocarbons (aliphatic)	U	M	U	U	S	U	S
Hydrocarbons (aromatic and halogenated)	U	U	U	U	M	M	S
Ketones	U	M	U	U	M	M	U
Oxidizing Agents (strong)	U	U	U	M	M	M	M
Salts	S	S	M	M	S	S	S

S = satisfactory resistance M = marginal resistance U = unsatisfactory resistance

* Polypropylene, polycarbonate, and cellulose propionate tubes with diameters of 5 to 13 mm may be sliced using the CentriTube Slicer (PN 347960) and appropriate adapter plate.

** Table life will be significantly reduced by autoclaving.

Note: This information has been consolidated from a number of sources and is provided only as a guide to the selection of tube materials. Soak tests at 1 g (at 20°C) established the data for most of the materials; reactions may vary under the stress of centrifugation, or with extended contact or temperature variations. To prevent failure and loss of valuable sample, ALWAYS TEST SOLUTIONS UNDER OPERATING CONDITIONS BEFORE USE.

Warning: Do not use flammable substances in or near an operating centrifuge.

Tubes and Bottles

General Filling and Sealing Requirements for Tubes and Bottles

	Tube or Bottle	Swinging-Bucket Rotors	Fixed-Angle Rotors
Polypropylene	Thinwall tubes	Within 2 to 3 mm of top	Full with cap
	Thickwall tubes	At least 1/2 full	1/2 full to max. capless level or full with cap
	Quick-Seal tubes	Full and heat-sealed	Full and heat-sealed
	Bottles	Min. to max. (see rotor manual) with screw-on cap or cap assembly	1/2 full to max. (see rotor manual) with screw-on cap assembly
Ultra-Clear	Open-top tubes	Within 2 to 3 mm of top	Full with cap
	Quick-Seal tubes	Not used	Full and heat-sealed
Polycarbonate	Thickwall tubes	At least 1/2 full	1/2 full capless level or full with cap or cap assembly
	Bottles	At least 1/2 full	Min. to max. (see rotor manual) with screw-on cap or cap assembly
Stainless Steel	Tubes	Any level	Any level with cap or cap assembly
Polypropylene	Tubes and bottles	At least 1/2 full	1/2 to max. capless level or full with cap or cap assembly
Polyethylene	Tubes	At least 1/2 full	1/2 to max. capless level or full with cap or cap assembly
Polytetrafluoroethylene (Teflon)	Tubes and bottles	At least 1/2 full	1/2 full to max. capless level or full with cap
Polyphenylsulfone (PPSU)	Container	At least 1/2 full	N/A

HarvestLine System Liners

Unique design enhances productivity

HarvestLine disposable bottle liners provide a significant improvement in the centrifugation of biological material. HarvestLine System Liners save time in the handling and retrieval of sample. Used in Avanti Series centrifuges, these unique liners provide a convenient method of loading, recovering, and storing samples.

HarvestLine liners can be sterilized (gamma radiation), placed in a freezer (-70°C) for prolonged storage, and are compatible with commonly used chemicals and solvents. They facilitate the harvesting of:

- Mammalian and insect culture separations
- Bacterial, yeast, and tissue homogenate isolations
- Virus harvesting for vaccine production—viral vector gene therapy and monoclonal antibody production.

JLA-8.1000 and JLA-9.1000 Fixed Angle Rotor with Liners

The 6 x 1 liter JLA-8.1000 rotor system with liners is ideal for harvesting bacterial and yeast cell cultures from fermenters, clearing cell debris from homogenates, or purifying large-volume viruses and polysaccharides for vaccine production. The 4 x 1 liter JLA-9.1000 rotor provides up to 16 800 x g for high throughput.

JS-5.0 Swinging Bucket Rotor with Liners

The 4 x 2.25 liter JS-5.0 rotor with liners is ideal for greater sample throughput. Use this system to separate bacterial, yeast, and tissue homogenates. At 7 480 x g, the rotor harvests *E. coli* at a clearing rate of 99% in less than 10 minutes (throughput of better than 36 liters per hour).

Specifications

Maximum Speed	
in the JS-5.0 rotor	5 000 rpm
in the JLA-8.1000 rotor	8 000 rpm
in the JLA-9.1000 rotor	9 000 rpm
Maximum g-force	
in the JS-5.0 rotor	7 480 × g
in the JLA-8.1000 rotor	15 970 × g
in the JLA-9.1000 rotor	16 800 × g
Run Time	Up to 20 min. instrument set time
Temperature Range	4° to 10°C
Acceleration/Deceleration	Up to instrument maximum settings

HarvestLine System for JLA-8.1000 and JLA-9.000 Rotors

HarvestLine System for JS-5.0 Rotor

Part Numbers

369264	HarvestLine System Liner Kit Includes 369256 one-liter bottle liners (qty 120), 368740 filling rack, 977472 funnel, and 369267 instructional CD.
369256	HarvestLine System Liners Fits JLA-8.1000 or JLA-9.1000 one-liter bottles (qty. 120).
368735	HarvestLine System Liners Fits JS-5.0 J-Wide Cups (qty. 50).

Tools and Supplies

Tools and Supplies

Rotor Cleaning Kit

339558 Rotor Cleaning Kit. Contains two 946-mL bottles of Solution 555 Rotor Cleaning Concentrate, 339379 Rotor Cleaning Brush, and 339380 Rotor Cleaning Brush

Replacement Parts/Supplies

339555 Solution 555 Rotor Cleaning Concentrate (min. order two Bottles)

339379 Rotor Cleaning Brush, $\frac{5}{8}$ -in. (16 mm) and 1-in. (25.4 mm), for Rotor Cavity diameters from $\frac{7}{16}$ -in. (11 mm) to 1-in. (25.4 mm) (min. order three Brushes)

339380 Rotor Cleaning Brush, $1\frac{1}{4}$ -in. (32 mm) and $1\frac{1}{2}$ -in. (38 mm), for Rotor Cavity diameters from 1-in. (25.4 mm) to $1\frac{1}{2}$ -in. (38 mm) (min. order three Brushes)

Guide to Centrifuge Selection

Centrifugation is a basic separation technique that is utilized at multiple stages in the study of sample components. Flexible rotor and adapter systems for each Beckman Coulter centrifuge allow them to be used across multiple application areas. To help you select the most appropriate centrifuge for your work, the following charts provide brief descriptions of the kinds of separations typically achieved using various centrifuges. These charts list frequent separation requirements for each sample type, and identify the centrifuges that are typically used to meet those requirements.

In addition to the separation and isolation of sample particles, centrifugation is increasingly being used as an analytical technique for the study of macromolecular interactions and the determination of molecular weights. Instruments for these applications are also listed below.

Quick-Reference Guide to Centrifuge Selection

Materials to Be Isolated	Specific Application	Centrifuges Typically Used		
		Avanti J	J6-MI	Avanti J-HC
Proteins	Ammonium sulfate precipitates	•		
	Centrifugal filtration	•	•	•
Subcellular Fractions				
Chromatin/Nucleosomes	Sucrose gradient isolation	•		•
Microsomes	Pelleting	•		
	Sucrose gradient isolation	•		
	Microsomal membrane fractionation	•		
Mitochondria	Pelleting	•		•
	Sucrose gradient isolation	•		
Nuclei	Pelleting	•	•	•
Membranes	Pelleting	•		•
	Sucrose/Percoll gradient fractionation	•		•
	Binding studies	•		•
Ribosomes/Polysomes	Pelleting	•		
	Size fractionation in sucrose gradients	•		
Cytosol	Clarification	•		•

Useful Formulas

***k* Factor**

To determine *k* factor

$$k = \frac{\ln(r_{\max}/r_{\min})}{\omega^2} \times \frac{10^{-13}}{3600} \quad \text{OR} \quad k = \frac{2.53 \times 10^5 \ln(r_{\max}/r_{\min})}{(\text{RPM}/1000)^2}$$

To determine pelleting time (*t*)

$$t = \frac{k}{s} \quad \text{where } s = \text{sedimentation coefficient in Svedbergs}$$

To relate pelleting time between rotors

$$\frac{k_1}{t_1} = \frac{k_2}{t_2}$$

To adjust *k* factor for runs less than maximum rotor speed

$$k_{\text{adj}} = k \left(\frac{\text{maximum rated speed of rotor}}{\text{actual run speed}} \right)^2$$

To relate relative centrifugal force (RCF) to speed (RPM):

$$\text{RCF}_{\max} = 1.12 r_{\max} \left(\frac{\text{RPM}}{1000} \right)^2 \quad \text{OR} \quad \text{RPM} = 10^3 \sqrt{\frac{\text{RCF}}{1.12 r_{\max}}}$$

To relate the sedimentation coefficient (*s*) to rotational speed:

$$s = \frac{dr}{dt} \times \frac{1}{\omega^2 r}$$

Svedberg unit (*S*) equivalent:

$$S = 10^{-13} \text{ seconds}$$

Reduced run speed for dense solutions:

$$\text{reduced run speed} = \text{max rated speed of rotor} \times \sqrt{\frac{A}{B}}$$

where A = max. permissible density of rotor tube contents, and
B = actual density of the tubes to be centrifuged

Support Services

Support Services

Field Service Support

Most of us appreciate the need for careful design, handling, and maintenance of certain kinds of laboratory equipment—the optics of a spectrophotometer, for example. It may not be obvious, however, that anything as substantial looking as a centrifuge rotor must be properly maintained during use in order for it to fulfill its life expectancy.

If you consider that, during rotation, a High-Performance Centrifuge Rotor may experience more than 110,000 times the force of gravity, it becomes apparent that seemingly minor flaws will assume much greater significance at these *g*-forces. In effect, one gram will “weigh” 110 kilograms, and a tiny flaw in a critical part may generate stresses greater than the rotor was designed to withstand.

We at Beckman Coulter maintain stringent quality standards and rigorously test every rotor design. Specific instructions for care and maintenance are included in the rotor manual that accompanies each rotor. And our Field Rotor Inspection Program is available at no charge to all users of Beckman Coulter High-Performance Centrifuges and Ultracentrifuges.

Field Rotor Inspection Program. What Is It?

Our Field Rotor Inspection Program (FRIP) has two purposes: to prevent premature rotor failures by detection of stress corrosion, metal fatigue, wear or damage to anodized coatings; and to instruct laboratory personnel in the proper care of rotors.

Contact your local Beckman Coulter Service Office for details on the Field Rotor Inspection Program. Using nondestructive methods (fiber optics borescopy and dye-penetrant analysis), they may find signs of corrosion or other damage. If so, they will recommend repair or replacement, and a potentially costly failure may be prevented.

To give a fuller understanding of rotors, a comprehensive slide presentation is also offered. Centrifuge users are informed about maintenance procedures, rotor damage, and its significance. The stress corrosion of aluminum rotors, in particular, can be greatly reduced by good laboratory practice.

For more information about the Field Rotor Inspection Program (FRIP), please go to:

<http://www.beckmancoulter.com/FRIP>.

Sometimes rotor corrosion is so bad it can be seen by the naked eye, while at other times it is not so apparent. If you have doubt about the condition of a single Beckman Coulter

rotor, you may return it to the factory where it will be inspected free of charge by our metallurgists. The rotor will be examined by a variety of nondestructive methods, including ultrasound which is capable of detecting internal flaws. Before shipping the rotor, you must contact the nearest Beckman Coulter Sales and Service office for specific instructions. A written statement must accompany each rotor, indicating that it is safe to handle, (*i.e.* free of any pathogenic or radioactive contamination).

Rotor Safety Seminars

To help you get the most from your Beckman Coulter rotors, Rotor Safety Seminars are frequently presented by our Field Service engineers. Seminars are designed to remind centrifuge users about the importance of proper rotor care and maintenance.

When you attend a Beckman Coulter Rotor Safety Seminar, you will have an opportunity to ask questions that are specific to your particular situation, and you will learn:

- What causes corrosion in a rotor, where it starts, what it does to the rotor, and how to avoid it
- The proper way to clean and store rotors
- How to get longer life from your rotor

On-Site Rotor Inspection and Maintenance

Specially trained Beckman Coulter Field Service engineers are available at your request for on-site inspection and minor rotor maintenance. Rotors that are free of biological and radiological contamination can be brought to these sessions for immediate inspection so you can continue operating your centrifuge with confidence in the condition of your rotors.

A Comprehensive Approach to Centrifuge System Care

Throughout the world, Beckman Coulter Field Service engineers are on hand to provide the support you need. So you can operate your centrifuges worry-free, a number of programs are in place that cover preventive maintenance of your system, including parts, labor, drive systems, and rotors. It all adds up to a comprehensive approach to maximizing your system investment.

Contact your local Beckman Coulter Sales and Service office to find out the specifics about the program available in your area.

High-Performance & High-Capacity Centrifugation

The power to accomplish more.

In the footsteps of our founder, Arnold O. Beckman, Ph.D., we at Beckman Coulter remain dedicated to your resourcefulness—helping to create productive and efficient laboratories, by providing high-quality centrifuges.

And with our high-performance and high-capacity solutions, we've set an all-new standard for enhanced power, speed and flexibility. As a result, you can achieve more throughput and greater control over your lab's workflow.

When you experience firsthand the quality built into our high-performance and high-capacity centrifuges, you'll see just how far innovation can lead.

A global presence. Focused on individuals.

Our innovations happen behind the scenes. Yet we touch people the world over by developing, manufacturing and marketing discovery systems and products that improve human health.

For over 75 years, we've been building a global reputation in hospitals, labs, and universities, where our life science research instruments are relied upon to perform vital roles day in and day out. Whether helping to solve complex biological problems, investigate the causes of disease, or find potential new cures, Beckman Coulter is focused on innovations that ultimately lead to healthier lives.
